

## The Original Waspinator Testimonials from 2005 and 2006

"I have always had a wasp phobia. In fact I never eat outside and have never in my life been able to enjoy outdoor dining. This summer I found myself in a situation where the group that I was with had decided to eat outside at a local restaurant. Reluctantly, and with my heart now pounding, I joined them. To my surprise there were no wasps. I asked the restaurant owner "How did you do it? There are NO wasps here?" He answered " The Original Waspinator". This was the first time in my entire life that I was able to enjoy a meal outside."

"I have used the Waspinator for about a month now and am amazed each day yet again. It really works exactly as it says! I have always had a problem with those big red wasps on my front porch, but not since hanging up the Waspinator! Now I can sit out on my porch in peace....and without the flyswatters and bug sprays. Everyone that sees it can't believe it and they always leave wanting to take MY Waspinator home with them! Thanks for making such a terrific product!"

### *Waspinator*

Well I have a *minor* problem with wasps at my appt. Well make that major. There are 3 nests with a 50-yard distance from my house. Which means the complex is swarming with them. I picked up the "waspinator" from the store. It is basically a cloth bag that is wide at the top and narrow at the bottom. You hang it from your eaves and bees and wasps think it's an "enemy" nest and stay away. (They are territorial). And to my surprise it worked! I also bought a can of pesticide but I haven't yet had to use it. I don't really want to go on a killing spree but if those little buggers make a nest near my appt. and start swarming outside my door you bet I'm going to knock that nest into next week. Especially now that I'm outside a lot more (weather permitting) doing my garden. Maybe if a few of the neighbors picked up some of these waspinators we could "run them out". Eh, it's good enough for me; my appt. hasn't seen a single one since I put it up yet my neighbors are swamped. :-\

I wanted you to know about our experience with your wonderful Waspinator. At a recent Sidewalk Sale at our Dig This store we blew up close to 60 yellow balloons. As I'm sure can imagine we attracted more than customers.....the wasps came shopping too! We swatted, we waved our arms, we ran for your Waspinator. It was quickly installed in a tree and in less than 20 minutes we were free of wasps. Wow! What a product .....thank you for making summer much more fun. We can all enjoy outdoor dining in relaxed comfort.
